

Reports are not showing all of the pages/data

Last Modified on 03/31/2021 3:28 pm EDT

When you open a report directly from Design Reports or from its icon, it automatically opens up in Design Mode. Design Mode only gives you a sample of pages or data on the report so that you can quickly switch back and forth from the Preview and Modify Design tabs. To see the entire report, click on the Modify Design tab, and uncheck the Design Mode at the bottom of the screen.
