

Extra digit in barcode (Check Sum Digit)

Last Modified on 03/31/2021 3:28 pm EDT

Problem

There is an extra digit in the barcode when scanned.

Solutions

1. Configure you scanner to drop the check digit.
 2. Use a different barcode symbology.
 3. If you cannot drop the check digit on your scanner and you are printing labels from All Orders make sure EnableChecksum property of the barcode control is set to False.
