

Importing Sales Orders from QuickBooks with Multiple Addresses

Last Modified on 03/31/2021 3:29 pm EDT

There may be instances when you need to import Sales Orders from QuickBooks and the Ship To Address is different than the Default Address.

Solution:

Go to File -> Import -> QuickBooks -> Sales Orders, select Addr1 in the drop down for "Ship To" Title Location.

You can filter the Sales Orders being imported by date (Newer than) or list specific sales orders by entering the sales order numbers (separated by commas) in QB SO#s.

You can also select the action taken in QuickBooks under Perform Action On QB Sales Orders.
