

# error 1327- invalid drive ( when installing)

Last Modified on 03/31/2021 3:29 pm EDT

## Issue:

When you start to install, you get error 1327, which references an invalid drive number.

## Causes:

The System Registry may be erroneously pointing to a temp drive.

## Solution:

Back up your Registry.

Select Start> Run> and then type Regedit.

Navigate to the following folder:

HKEY\_CURRENT\_USER\Software\Microsoft\Windows| CurrentVersion\ Explorer\User Shell

In the right panel, search for entries that list the incorrect drive.

Modify the incorrect drive to point to **C:\**.
