

# Sales orders with multiple shipping dates

Last Modified on 10/18/2021 4:16 pm EDT

In your business your customers may place 'blanker orders' or orders in which your customers want to be shipped on specified dates. One solution is to create multiple sales orders however All Orders has the ability of handling multiple ship dates on a single order.

When you have multiple shipping date on one order the 'Due Date' is not used instead, All Orders uses the 'Item Ship Date' to determine when and how much of an item should be shipped to the customer. Assume you receive a PO from a customer as follows:

Line No 1, Item 7809-0987

Ship on December 2, 2008 - Quantity 5

Ship on January 2, 2008 - Quantity 10

Line No 2, Item 7809-0989

Ship on December 2, 2008 - Quantity 10

Ship on January 2, 2008 - Quantity 20

To record the above, you **create a sales** order and add the first item, which in our example is 7809-0987. Once the item has been added to the sales order click the Detail icon and select 'Ship Date'.

The screenshot displays the 'Sales Order' window in the All Orders application. The window title is 'DELL\_M2300\_1\ALLORDERS\NCDEMOCOMPANY - All Orders by NumberCruncher - [Sales Order]'. The interface includes a menu bar (File, Edit, Lists, Company, Sales, Purchasing, Production, Warehouse, Reports, Window, Help) and a toolbar with icons for Quote List, Sales Order List, Shipping List, Home, and Sales Order. The main area shows order details: Customer (Bonnie), Ship To Address (Default), Ship From Location (HQ), Order # (318), Order Date (11/10/2008), and a checked 'Allow Back Orders' option. Below this is a table with columns for Term, Sales Rep, FOB, Class, Promise Date, and Customer PO. The main table lists one item: 7809-0987, 43 40 Ten, with 1 ordered, 0 shipped, and 0 back orders. The subtotal is 18.75. A right-hand menu is open, showing options like Insert Line, Delete Line, Add New, Select All, Deselect All, Item Info, Full Description, Comments, Custom Fields, W/O Custom Fields, Dependency, Ship Dates (highlighted), Ship To Locations, and Change UOM. The 'Entered By' field is empty.

Item	Description	Ordered	Shipped/...	Back Order	Available	UOM	Price Per	Total P...	Kit	Tax	Clear	Det...
7809-0987	43 40 Ten	1	0	0	2	EA	18.75	18.75		Tax		

You will then see the 'Enter Ship Dates' dialog. At this point click on the first date and change it to 12/2/2008, click the tab key and change the quantity to 5. Click on the second line and enter 1/2/2009 tab and enter quantity of 10. When done, click Save & Close.

Date	Qty Ordered	Qty Shipped	Details
12/2/2008	5	0	▼
1/2/2009	10	0	▼

  

Target Quantity	Quantity Assigned	Quantity Unallocated
15	15	0

Repeat the above for the second item.

All Orders provides a sales order template that displays multiple ship dates called Sales Order - Item Ship Dates. As with all other forms and reports in All Orders, you can customize this form to suit your needs.

Item	Description
7809-0987	43 40 Ten

  

Ship Date	Ordered	Back Order	UOM	Price Per	Total Price
12/2/2008	5	0	EA	18.75	93.75
1/2/2009	10	0	EA	18.75	187.50
					281.25
	15	0			

  

Item	Description
7809-0989	4x4 widget

  

Ship Date	Ordered	Back Order	UOM	Price Per	Total Price
12/2/2008	10	0	EA	18.75	187.50
1/2/2009	20	0	EA	18.75	375.00
					562.50
	30	0			

The recommended report to view sales orders by ship date is called 'Sales Order by Due Date' available from **Reports --> Sales Orders**.

When you press the 'Fill' button, the Batch Shipping screen will be shown instead of a Ship Doc as All Orders needs to know which item ship date to process. If the current date is BEFORE the first item ship date, the Batch Shipping screen will be blank because by default the Batch Shipping screen filters the ship date. To show all the ship dates change the filter and then click the 'Reload Orders' button.

Memo:

Then to generate the ship docs, I clicked the 'Process button'
