

# ShipRush crashes All Orders.

Last Modified on 10/12/2021 1:29 pm EDT

When ShipRush is installed, All Orders will spontaneously close.

To fix the issue download the attached file listed below. The name of the file is ShipRush.reg. Once downloaded, double click it and allow it to import into the system registry. Once completed successfully All Orders will no longer crash.

\*\*\* NOTE \*\*\*

The above must be done for each Windows user that logs into a machine. For example when ShipRush is on a server and multiple Windows users log into the server using RDC (Remote Desktop Connection).

[Ship Rush Utility.exe](#)
