Invalid use of NULL

Last Modified on 03/31/2021 3:29 pm EDT

If you are receiving this error, typically it means that there is a piece of information that is missing somewhere. Remove the item/doc that is causing the error from the sync queue-->make sure the sync queue is clear--> run a selective selective sync with ALL boxes checked-->and try to post again to QB.

If you are still experiencing trouble, please contact support.
